Assignment-12

Name : Shivam Raj
Roll : 24052323

1.

```java
import java.util.Scanner;
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        System.out.print("Enter a two-digit number: ");
        if (scanner.hasNextInt()) {
            int number = scanner.nextInt();
            if ((number ⩾ 10 && number ⩽ 99) || (number ⩽ -10 && number ⩾ -99)) {
                System.out.println("The number you entered is: " + number);
            } else {
                System.out.println("Error: That is not a two-digit number.");
            }
        } else {
            System.out.println("Error: Please enter a valid integer.");
        }
        scanner.close();
    }
}import java.util.Scanner;

```

```
Enter a two-digit number: 12
The number you entered is: 12
```

2.

```java
import java.util.Scanner;

public class StringAddition {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        System.out.print("Enter first number: ");
        String str1 = scanner.nextLine();

        System.out.print("Enter second number: ");
        String str2 = scanner.nextLine();

        try {
            int num1 = Integer.parseInt(str1);
            int num2 = Integer.parseInt(str2);

            int sum = num1 + num2;

            System.out.println("The sum of " + str1 + " and " + str2 + " is: " + sum);
        } catch (NumberFormatException e) {
            System.out.println("Error: One of the inputs is not a valid integer.");
        }

        scanner.close();
    }
}
```

```
Enter first number: 12
Enter second number: 23
The sum of 12 and 23 is: 35
```

3.

```java
import java.io.*;
import java.util.*;
public class FileSorter {
    public static void main(String[] args) {
        String fileName = "data.txt";
        List<Integer> numbers = new ArrayList<>();
        try (Scanner fileScanner = new Scanner(new File(fileName))) {
            while (fileScanner.hasNextInt()) {
                numbers.add(fileScanner.nextInt());
            }
            System.out.println("Original numbers: " + numbers);
        } catch (FileNotFoundException e) {
            System.out.println("Error: The file '" + fileName + "' was not found.");
            return;
        }
        Collections.sort(numbers);
        try (PrintWriter writer = new PrintWriter(new FileWriter(fileName))) {
            for (int num : numbers) {
                writer.println(num);
            }
            System.out.println("File sorted and updated successfully.");
        } catch (IOException e) {
            System.out.println("Error writing to file: " + e.getMessage());
        }
    }
}
```

```
Original numbers: []
File sorted and updated successfully.
```
